ANISHA PATURI

Student

Passionate Computer Science Engineering student at KMIT (CGPA 8.6) with hands-on experience in full-stack and AI-driven development. Skilled in the MERN stack, Java, and Python, with internship experience at IBaseIT and ODT. Dedicated to building scalable, intelligent solutions that create real-world impact.

WORK EXPERIENCE

IBaseIT — **MAY 2024 - JUNE 2024**

- GradeSync is a student grade management system that uses Python, PHP, and SQL to add, display, and calculate student grades efficiently. It streamlines managing student data and class averages through a web-based interface.
- Tech Stack: Python, HTML, CSS, MySQL
- https://github.com/AnishaPaturi/GradeSync.git

ODT — **APRIL 2025 - JUNE 2025**

- PythonLonden is a project that transforms the PHP Symfony 1-based Londen's Campaign Manager into Python, aiming to enhance maintainability and performance. The original system offers dashboards for mailed campaigns, response tracking, and data visualization.
- Tech Stack: Python
- https://github.com/AnishaPaturi/PythonLonden.git

PROJECTS

Ctrl+S of Shame — **MARCH 2026**

A comprehensive AI driven mental wellness application designed to help users track their moods, manage wellness, and connect with psychiatrists. Built with modern web technologies for a seamless user experience.
Tech Stack: TypeScript, VS Code Extension API, Node.js
(Available on VS Code Marketplace)

Network Security Toolkit — **MARCH 2026**

Built a Java-based network security toolkit capable of performing multithreaded port scanning, banner grabbing, LAN host discovery, and live packet capture using the Pcap4J library. Implemented socket-based scanning to detect open services (HTTP, HTTPS, SSH) and developed a packet analyzer that extracts source IP, destination IP, protocol type, and packet size from real-time traffic.
Tech Stack: Java, Socket Programming, Multithreading, Pcap4J, Npcap
https://github.com/AnishaPaturi/network-port-scanner.git

EDUCATION

2023 - 2027
Keshav Memorial Institute of Technology

- B.Tech , CSE

SKILLS

- Front End: HTML, CSS, JS, React
- Middle Tier: C, Java, Python, C++
- Back End: MySQL, MongoDB, Express.js, Node.js
- Frame Works: BootStrap, SpringBoot(Basics)
- AI/ML: Machine Learning, Deep Learning, Transformers, GenAI, Streamlit, TensorFlow, Keras, PyTorch, Transformers, Vision Transformer (ViT)
- Agentic AI: LangChain, LanGraph
- Cloud & DevOps: AWS, Docker, Kubernetes
- Computer Science Fundamentals: Data Structures & Algorithms (DSA), Algorithm
- Analysis, Problem Solving, Competitive Programming
- Backend Concepts: Pagination, Idempotency, Caching (Redis Basics)
- Tools & Platforms: Git, GitHub, Jupyter Notebook

VizTalk

MARCH 2026

Created VizTalk, a conversational data analytics platform that transforms voice/text queries into actionable insights and charts. Implemented speech recognition, natural language query interpretation, and automated visualization generation.
Tech stack: Python, Streamlit, Whisper, FFmpeg, OpenRouter APIs, DeepSeek LLMs, JSON-based storage.
https://github.com/AnishaPaturi/VizTalk.git

Mood Angels

AUGUST 2025 - DECEMBER 2025

Developed and published a VS Code extension that detects errors on file save and debug events using the VS Code Diagnostics API. Deployed to the Visual Studio Code Marketplace.
Tech Stack: React, Python, Agentic AI, MongoDB, Express.js, Node.js
https://github.com/AnishaPaturi/Mood-Angles

Safe Street

APRIL 2025 - JUNE 2025

SafeStreet is an AI-powered platform that detects, reports, and manages road damage via mobile and web interfaces. It enables users to capture images of potholes/cracks, auto-classifies severity, sends reports, and gives authorities a dashboard to track & act.
Tech Stack: React, Transformers, MongoDB, Node.js, Express.js
https://github.com/AnishaPaturi/SafeStreetApplication

Campus Connect

JANUARY 2025 - JUNE 2025

College-Connect is a web platform that unifies campus life by offering students access to events, announcements, study resources, and forums in one place. It streamlines college communication, giving admins tools to manage content while students stay plugged into academic and social updates.
Tech Stack: HTML, CSS, Java Script, MongoDB, Express.js, Node.js
https://github.com/AnishaPaturi/College-Connect

Talent Match

NOVEMBER 2024 - DECEMBER 2024

Talent-Match is a platform where users post problems or skill-based queries, and the system matches them with knowledgeable individuals. If someone accepts, they collaborate on a shared interface to solve the issue together.
Tech Stack: HTML, CSS, Java Script, MongoDB, Express.js, Node.js
https://gitub.com/AnishaPaturi/Talent-Match

COLLEGE ENGAGEMENT

- 1st Position in a hackathon in GeeksForGeeks, 2026
- Participated in VJIT Hackathon,
- 2023
- Attended a workshop IITH for Gen AI course
- Worked as Volunteer for DBMS Workshop in KMIT, 2024
- Worked as Volunteer in NMDC Hyderabad Marathon, 2024
- Participated in a Product Space Hackathon, 2025
- 3rd place in an AGentic AI Hackathon

OTHER DETAILS

- Domicile: Hyderabad, India
- Languages: English, Telugu, Hindi
